War-Time Programs 1943

During the year 1943 Hamilton College felt the mounting impact of the war. While the civilian program for an ever-diminishing student-body steadfastly upheld the tradition of the liberal arts, Military Programs for Army trainees utilized increasingly the services of the college.

THE CIVILIAN PROGRAM

The repercussions of the war produced a variety of changes in the normal civilian program. Among them the following should be recorded for historical purposes:

The Term System: With the opening of college for a summer session, the Term of twelve weeks' duration replaced the semester of sixteen weeks' duration. Under the term system each course met for four periods a week, the laboratory periods covering two class periods. For a term's work all courses, except those in Public Speaking, were accredited as three credit-hours towards graduation. The normal program required four courses in addition to work in Public Speaking.

Credit for Students Entering Military Service: Upperclassmen who left college during a session were granted credit under the following conditions: (a) at least half of the semester's work must have been completed; (b) withdrawal from college must have been involuntary; (c) the grade at the time of leaving must have been of at least C quality in those courses for which credit was to be given.

Hamilton students who took courses in programs sponsored by military authorities but given at reputable collegiate institutions under academic direction were eligible for credit under the normal regulations concerning transfer credit.

Freshman Pre-military Program: Beginning with the summer term a pre-military program was offered to all entering freshman. The program of study required courses in English Composition, Mathematics, Public Speaking, Military Drill, and Physical Education and necessitated the election of two courses among the languages, American History, and the laboratory sciences. Under semi-military discipline, during the summer term, the freshmen were required to take care of their own rooms, to keep specified hours for sleep and to remain on the Hill except for week-ends. These restrictions were somewhat relaxed for the fall term.

Diminishing Enrollment: The civilian student body dwindled from 399 in January to 59 in December. At the commencement exercises of January 31, forty-one of the students, still enrolled in college, received degrees. At the same time 139 other undergraduates departed, almost exclusively to enter military service. The enrollment during the second semester fell from 229 to 177. Thirty-four degrees were awarded at the Commencement Exercises of June 6; two to men who had not been in residence during the semester, fourteen to men who had left involuntarily after having completed at least half of the semester's work; and eighteen to men who had remained in residence throughout the semester.

The summer term beginning on July 1, opened with an enrollment of 57 upperclassmen, one of whom had returned from war service, and 29 freshmen. Eleven men dropped out during the term. On September 23, fourteen degrees were awarded; one to a Hamilton student who had completed his credits in the Pre-Meteorological Program, three to men who had left involuntarily after having completed at least half of the term's work; and ten men who had completed the term in residence.

The fall term began on September 30 with an enrollment of 67 men, four of whom now returned from war service and fifteen of whom were new freshmen. The total freshmen class now numbered 27, the average age of whom on October 1 was 17.5 years in contrast with a normal average of 18.3 years. Eight men were lost during the fall term.

Courses Offered: The diminution of the civilian student body led to the curtailment of course-offerings. The number of courses given declined from 101 at the end of the first semester to 76 for the second semester, to 37 for the summer term and to 42 for the fall term.

Student Living Accommodations: From July 1 to the end of the year the housing and dining operations for the civilian students were confined to the fraternity houses of Alpha Delta Phi, Psi Upsilon and Delta Kappa Epsilon.

Student Organizations: The decline in student enrollment caused the temporary abandonment of normal student organizations during the second half of the year. The fraternities ceased to function, their houses were pooled under the Fraternity Management Agency and pledging was for the time being discarded. The Honor System continued to operate effectively. Although inter-collegiate contests

ceased, informal intramural athletics afforded recreational opportunities to all undergraduates.

Religious Program: The college maintained its religious program in full vigor throughout the year. Public worship was conducted in the Chapel on every Sunday while college was in session. During the summer term the Sunday service was held at 5:00 P.M., but for the rest of the year it began at 11:00 A.M. The Reverend David Barnwell of Summit, New Jersey, served as College Chaplain during the months of July and August.

MILITARY PROGRAM

Hamilton has made its resources available to the Military from the very beginning of the Defense Program. Through the College Year, 1942-43, three separate training programs of a military nature have been undertaken on the campus.

Pilot Training: In the autumn of 1940, the Civilian Aeronautics Administration instituted at the College a Civilian Pilot Training Program, principally for Hamilton students who took ground school training on the campus and flight instruction at the Utica Airport. The latter was provided by the Utica Aviation School. The course was optional, but some academic credit was given for completion. This program continued until July, 1942, when the course was withdrawn for Hamilton civilian students, but was offered full-time to Navy fliers and to prospective non-combat Army flyers, who, before being assigned to regular Army or Navy fields, completed the earlier stages of pilot training under the Civil Aeronautics Administration.

Later, as the Army and Navy developed its own training facilities, the need for the Hamilton program disappeared, and the program was abandoned. By that time, however, July, 1943, the College had assisted in the training of approximately 350 Army and Navy pilots.

Pre-Meteorological Training: One of the earliest training programs established in liberal arts colleges for military trainees, was that created by the Army Air Forces to meet the demand for trained meteorologists. Hamilton was one of fourteen institutions throughout the country selected to give the first stage of this training. Accordingly, classes in pre-meteorology began on February 22, 1943, for a pre-meteorological unit of 200 men designated as Detachment 18 of the Army Air Forces Technical Training Command (subsequently the 64th A.A.F. Technical Training Detachment). Three months later a second unit of 165 men arrived. Each unit continues at Hamilton for twelve months, taking intensive training in mathematics and physics. Their program also includes geography, history, English composition, public speaking, physical training, and military drill. A maximum of 45 semester hours of credit towards a Hamilton degree is granted by the College on successful completion of the course.

Area and Language Training: As a part of the Army Specialized Training Program, the 3219th Service Command, Service Unit, comprising 200 men, on July 12, 1943, began a nine-months' course designated by the Army as "Area and Language." The training is designed to equip Army personnel who eventually will be assigned to duty in Western or Central Europe. Each trainee is given an accelerated course in conversational French or German and is instructed as to the historical background and present day social, economic, and political conditions in the area of his anticipated assignment. The unit also receives physical education and military drill.

Admission

Freshmen classes will begin their studies in July and October of 1944. Application for admission should be made to the Secretary of Admissions. A candidate for admission is expected to have completed a secondary school course which gives preparation for the work of a liberal arts college. Fifteen units will be required drawn from the usual college preparatory subjects of English, mathematics, foreign language, science, and social studies.

Such units may be accredited by (1) Examinations of the College Entrance Examination Board, (2) Examinations of the Regents of the University of the State of New York, (3) By Certificate from the Principal of an approved school in which the candidate has prepared.

The Committee on Admissions will, however, consider the applications of exceptionally able candidates who are highly recommended by the school but whose preparation is somewhat irregular in number of units presented and subjects studied.

The Hamilton plan of individualized admissions has been established on the principle that secondary school preparation and all other admissions questions must be reviewed individually for and with each candidate.

Each candidate must present a score on a standard scholastic aptitude test certified by his secondary school or by the College Entrance Examination Board. Candidates who have not taken tests in their schools or who do not take the April or the June examination of the College Entrance Examination Board must take the Hamilton College test at a time to be arranged with the College.

Since Hamilton is a small college, the character and personal qualifications of students are of great importance. Every candidate must therefore be interviewed at the College, at his school, or at his home by a member of the College staff.

Requirements for Graduation

1. The requirement for graduation demands the completion of 133 hours of credit in required and in properly chosen elective courses. Under the Term System, normally a course meets for 4 hours each week during a Term of 12 weeks. Exceptions to this normal practice occur in courses involving laboratory work and in Public Speaking. The science courses involving laboratory work meet for eight hours each week, partly in classroom and partly in laboratory. Public Speaking 5-6 meets for three hours a week; other courses in Public Speaking meet one hour a week. In all courses, except those in Public Speaking, three hours of credit are allotted for each term of 12 weeks. Normally, a student takes in each term four courses in addition to prescribed work in public speaking. Any deviation from the normal number is subject to the approval of the Academic Council.

2. The requirement for graduation demands, when it is possible under the war-time program, the completion of two majors. Each major consists of not less than six term courses in a single department. The following courses, however, may not be counted as contributing toward a major: Greek 1-2, German 1-2, French 1-2, Spanish 1-2, Italian 1-2, Mathematics 1-2. The courses chosen for the majors and any deviation from the normal requirement must be approved by the Academic Council.

3. At least six hours of credit in one of the natural sciences must be gained for graduation.

4. The foreign language requirement is not expressed in terms of courses taken, but rather in terms of achievement in attaining a reasonable proficiency in one language (Greek, Latin, French, German) as determined by special examination. The special examination is open normally to students then enrolled in a course numbered 5-6 or higher in the language of their choice (3-4 in the case of Latin). Others may be admitted to examination by permission of the department concerned when special circumstances warrant such exception.

5. Credits acquired in programs sponsored by military authorities but given at reputable collegiate institutions under academic direction will be treated in the usual manner for transfer credit.

6. All grades are based on a scale of 100. A grade of 90 or over is reported as A; 80-89, B; 70-79, C; 60-69, D; 40-59, F; and below 40, FF. The passing mark is 60; but a student, in order to qualify for

graduation, must have completed with grades as high as 70 not less than 45 credit hours in regular three-hour courses subsequent to freshman year.

COURSES OF FRESHMAN YEAR

REQUIRED

English Composition 1-2	3 credit hours
Mathematics 1-2A or 1-2B	3 credit hours
Public Speaking 1-2	1 credit hour

COURSES OF SOPHOMORE, JUNIOR AND SENIOR YEARS

REQUIRED

Courses in the Department of Public Speaking are required of all students. During the third and fourth terms of residence each student will have four hours a week (3 credit hours) of Public Speaking. During each other term, he will have one hour.

ELECTIVE COURSES

Except for the reqiured work as above described, all courses of sophomore, junior and senior years are elective. Courses continue through two terms and must be elected accordingly. The choice of courses is made under a group system, the departments of study being arranged in three groups, as follows:

Group A. Foreign Languages.

Group B. Art, Economics, Education, English Composition, English Literature, Ethics and Religion, History, Music, Philosophy, Political Science, Public Speaking.

Group C. Mathematics, Natural Sciences.

Under the war-time program, students who have completed two terms of work must take in each subsequent term at least one course from each of two groups.

Upon satisfactory completion of the requirements, the degree of Bachelor of Arts is awarded.

Finances

RESOURCES OF THE COLLEGE

The financial resources of the College at the end of the academic year 1942-43 totaled $6,996,360.44 allocated as follows:

College Property and Buildings.....	$ 2,868,832.49
Endowment Funds.....	3,913,383.11
Current Funds.....	169,806.31
Unexpended Appropriations.....	46,338.53

Because the per student endowment of the College is one of the highest among the colleges of the country, tuition and other costs have been kept at a minimum. During the year 1941-42 the College paid from its endowment fund income 38.1 per cent of the average cost for the year's work of members of the student body. The average income per student for tuition, laboratory fees, etc., totaled $443.62. The average cost to the College totaled $716.65 of which the College paid $273.03.

APPLICATION AND REGISTRATION FEES

An application fee of $5 (not returnable) must accompany each application for admission.

A registration fee of $10 (not returnable) is required of all candidates for admission within fifteen days after the receipt of formal notice of acceptance. This fee is credited on the first term tuition charge.

EXPENSES

Because of its endowment, Hamilton has been able to set an all-inclusive fee of $325 each term. This will cover every essential expense — other than text books — including tuition, room, board, laboratory and infimary fees.

HONORS, PRIZES AND SCHOLARSHIPS

The list of honors and prizes is given on pages 54-60 and the list of scholarships on pages 66-68 of the catalogue for 1942-43.
